

SMALL PRIMATE HANDLING

When handling small animals such as New World primates dexterity coupled with protection is vital for the security of both the subject and handler. Lomirs' small primate handling gloves offer a smart solution for protection during long periods of wear.

Manufactured from a soft yet durable goat skin, these gloves are a comfortable fit and lined with knitted Kevlar to provide extra protection and slash resistance.

Kevlar lining provides extra protection from slashing and tearing.

SAFE, DURABLE AND COMFORTABLE
