

Trocars

Skin tunneling needles (trocars) offer a quick and easy method for routing catheters and electrodes subcutaneously. Our trocars are manufactured from thick walled medical grade stainless steel and have a semi-blunt 45 degree beveled tip or a stylet. The 7G trocar is perfect for most large animal catheters while the 10G is suited for smaller animals and catheters. Call for custom lengths.

TRO-7-6	Semi-Blunt Tip, 7 gauge x 6"/15cm
TRO-7-12	Semi-Blunt Tip, 7 gauge x 12"/30cm
TRO-10-8	Semi-Blunt Tip, 10 gauge x 8"/20cm
